CONTENTS OF VOLUME XXV.

NUMBER LXXIII.

Page.

ART. I. On the Idea of Physical and Metaphysical Infinity; by Lieut. E. B. HUNT, - - - - - - - - - 1

II. On the Characters, Principles of Division, and Primary Groups of the Class Mammalia; by Professor OWEN, F.R.S., F.L.S., 7

III. On the Rational Constitution of certain Organic Compounds; by Prof. WOLCOTT GIBBS, M.D., - - - - - - 18

IV. The Estimation of the Weights of very small portions of Matter; by Prof. ALFRED McMAYER, - - - - - 39

V. On the Behavior of the Carbonates of Lime and of Baryta in presence of various Saline Solutions. With remarks on the Determination of Carbonic Acid in Mineral Waters; by FRANK H. STORER, - - - - - - - - 41

VI. On the Heights of the Tides of the Atlantic Coast of the United States, from observations in the Coast Survey; by A. D. BACHE, Superintendent.—With a Plate, - - - 47

VII. On the Winds of the Western Coast of the United States, from observations in connection with the U. S. Coast Survey; by A. D. BACHE, Superintendent.—With a Plate, - - - 52

VIII. Notes on the Measurement of a Base for the primary triangulation of the Eastern Section of the Coast of the United States, on Epping Plains, Maine; by A. D. BACHE, Superintendent U. S. Coast Survey.—With a Plate, - - - 58

IX. On the Influence of Musical Sounds on the Flame of a Jet of Coal-gas; by Prof. JOHN LECONTE, M.D., - - - 62

X. On the Motion of the Gyroscope as modified by the retarding forces of friction and the resistance of the air: with a brief analysis of the "Top;" by Maj. J. G. BARNARD, A.M., - 67

XI. Review of the Operations and Results of the United States Coast Survey, - - - - - - - - - - 75

Page.

XII. The Open North Polar Sea; by R. W. HASKINS, A.M., . 84

XIII. Correspondence of M. JEROME NICKLÈS.—Obituary of Cauchy, 91.—Anesthesis by means of Amylene: Anesthesis by "Projection," 95.—Compressed air: Cultivation of Madder: Toxicology, Researches on Arsenic, 96.—Aquarium, 97.

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Electrolytic investigations, 98.—On the influence which metals exert upon radiant heat, 99.—On an optical test for Didymium: On the employment of the salts of alumina in the analysis of plants, 100.—On some derivatives of gallic acid: On the combinations of tartaric acid with saccharine matters, 101.—On the action of light upon oxalate of peroxyd of iron: On the Chemistry of the Primeval Earth, by T. STERRY HUNT, 102.—On the Amount and Frequency of the Magnetic Disturbances and of the Aurora at Point Barrow, on the Shores of the Polar Sea; by Major General SABINE, 103.—On the Direction of Gravity at the Earth's Surface; by Prof. HENNESSY, 106.

Mineralogy and Geology.—Brucite at Wood's Mine, Chester Co., 107.—Descriptions of New Species of Palæozoic Fossils, by JAMES HALL: Cosmogony, or the Mysteries of Creation, by THOS. A. DAVIES, 108.—On the existence of Forces capable of changing the Sea level during different Geological Epochs, by Prof. HENNESSY, 109.

Botany and Zoology.—Monographie de la Famille des Urticées, par H. A. WEDDELL, 109.—Miquel's Flora van Nederlandsch Indië, or Flora Indiæ Batavæ, 111.—Walpers: Annales Botanices Systematicæ: Jahrbücher für Wissenschaftliche Botanik, herausg. von Dr. N. PRINGSHEIM: Radlkofer, On the Process of Fecundation in the Vegetable Kingdom, and its relation to that in the Animal Kingdom, 112.—Natural History of the Spongiadæ, 114.—Seeman's Botany of the Voyage of the Herald, parts IX, and X: Dr. J. D. Hooker, On the Structure and Affinities of Balanophoreæ, 116.—Boussingault, Researches upon the influence which assimilable nitrogen in manures exerts upon the production of vegetable matter, etc, 120.—Action of foreign pollen upon the Fruit, 122.—Structure and development of the Flower and Fruit of the Pear, by J. DECAISNE, 123.—Naturhistoriske Bidrag til en Belkrivelle of Grönland, af J. REINHARDT, etc. 124.—Contributions to The Natural History of the United States of America, by LOUIS AGASSIZ, 126.

Astronomy.—New Asteroids: New Comets, 128.—New Double Stars discovered by Mr. Alvan Clark, Boston, U. S.; with appended Remarks, by the Rev. W. R. DAWES, 129.

Miscellaneous Scientific Intelligence.—Prof. Richard Owen of Nashville, Tennessee, on the Outlines of the Continents, 130.—On the Supposed Meteorite from Marblehead, by A. A. HAYES, 135.—On the Volcano of Kilauea, Hawaii, by the Rev. TITUS COAN: Earthquakes, 136.—Tables of the Division of Mankind into Races, Branches, Families and Nations, with an approximate statement of the Population; by M. D'OMALIUS D'HALLOY, 137.—Artesian Wells in Sahara, 140.—Ascent of Chimborazo, 141.—New Electrotype Processes: On a new method of Refining Sugar, by Dr. DAUBENY, 144.—Report on the Development of Heat in Agitated Water, by Mr. G. RENNIE, 145.—Fossils of South Carolina, by M. TUOMEY and F. S. HOLMES: On the Direction and Velocity of the Earthquake in California, January 9, 1857, by Dr. JOHN B. TRASK, 146.—Action of Light, 148.—General View of the Animal Kingdom, by A. M. REDFIELD: Reports

of Explorations and Surveys for a Railroad from the Mississippi River to the Pacific Ocean, 149.—Report of the Geological Survey of the State of Vermont, by EDWARD HITCHCOCK, 150.—Flora from the Appalachian Coal-field, by JAMES P. KIMBALL: On the Determination of Altitudes, from Observations taken with the Barometer, etc., by Lieut. HENRY L. ABBOT: Uber neue Echinodermen des Eifeler Kalkes, von JOH. MÜLLER: Topographical and Geological Report of Chester Co., Pennsylvania, by W. D. HARTMAN, M.D.: Kobell's Determinative Mineralogy, translated by G. J. BRUSH and S. W. JOHNSON: Volcano of Hawaii: Organic Morphology, 151.—New Publications, 152.

NUMBER LXXIV.

Page.

ART. XIV. An Address in Commemoration of Professor J. W. BAILEY, late President of the American Association for the Advancement of Science; by Dr. A. A. GOULD, - - 153

XV. On some remains of Batrachian Reptiles discovered in the Coal Formation of Ohio, by Dr. J. S. Newberry and Mr. C. M. Wheatley; by JEFFRIES WYMAN, M.D., of Cambridge, Mass., - - - - - - - - - 158

XVI. Fichtelite, a fossil carbo-hydrogen found in the "Fichtelgebirge" of North Bavaria; by T. EDWARDS CLARK, Ph.D., 164

XVII. On the Characters, Principles of Division, and Primary Groups of the Class Mammalia; by Professor OWEN, F.R.S., F.L.S., etc., - - - - - - - - - 177

XVIII. On Chalcodite; by GEORGE J. BRUSH, - - - 198

XIX. Agassiz's Contributions to the Natural History of the United States; J. D. DANA, - - - - - - - 202

XX. Contributions to the History of Ophiolites. Part I; by T. STERRY HUNT, - - - - - - - - - 217

XXI. The Chalchihuitl of the ancient Mexicans: its locality and association, and its identity with Turquois; by W. P. BLAKE, 227

XXII. On a method of Preparing and Mounting Hard Tissues for the Microscope; by CHRISTOPHER JOHNSTON, M.D., 232

XXIII. Blodget's Climatology of the United States and of the Temperate Latitudes of the North American Continent, - 235

XXIV. Preliminary notice of a new base containing Osmium and the elements of Ammonia; by WOLCOTT GIBBS and F. A. GENTH, - - - - - - - - - 248

XXV. Review of the Operations and Results of the United States Coast Survey, - - - - - - - - 249

XXVI. Description of New Carboniferous Fossils from the Appalachian, Illinois and Michigan Coal-fields; by R. P. STEVENS, - - - - - - - - - - 258

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Researches on indices of refraction, 265.—On the density of the vapor of certain bodies, 266.—Memoir on the equivalents of the elements, 267.—On new compounds of Silicon, 270.—New researches on Boron, 271.—On the Magnetic Induction of Crystals, by Professor JULIUS PLÜCKER, 272.

Geology.—Quarterly Journal of the Geological Society, 274.—Annual Report of the Geological Survey of the State of Wisconsin, by EDWARD DANIELS: On the Newer Pliocene and Post-pliocene deposits of the vicinity of Montreal, by J. W. DAWSON, LL.D, 275.—Crinoids of New York, 277.—On the Cervus euryceros, by Prof. DE MORLOT, 279.—Former connection of Australia, New Guinea and the Aru Islands: Earthquake in Italy, 280.—Grenelle Artesian well: Chemische und Chemisch Technische Untersuchung der Steinkohlen Sachens, von Prof. W. STEIN: Tooth of the American Elephant: Second Report on the Geological Survey of Kentucky, by DAVID DALE OWEN, ROBERT PETER and SIDNEY S. LYON, 283.—New Species of Fossil Plants from the Coal-fields of Pennsylvania, by LEO LESQUEREUX: Illinois Geological Survey, by J. G. NORWOOD, M.D., 286.—Denkschriften der Kaiserlichen Akademie der Wissenschaften Mathematisch-naturwissenschaftliche Classe: On the part which the Silicates of the Alkalies may play in the Metamorphism of Rocks, by T. STERRY HUNT, 287.—On the Extinct Volcanoes of Victoria, Australia, by R. BROUGH SMYTH, Esq., 289.—On the occurrence of Marine Animal Forms in Fresh-water: Wollaston Medal, 290.

Botany and Zoology.—DeCandolle's Prodromus, 290.—Dr. Hooker's Flora of Tasmania: Journal of the Proceedings of the Linnæan Society, 292.—Plantæ Indiæ Batavicæ Orientalis, quas . . . exploravit CASP. G. C. REINWARDT: Botanical Necrology for 1857, 293.—Nature of the occurrence of Green-gilled Oysters, by W. J. TAYLOR: Humming Bird of the U. States, 294.—Leptosiagon, 295.

Astronomy.—Note on the Periodicity in the Sun's Spots, by O. REICHENBACH, 295.

Miscellaneous Scientific Intelligence.—Telestereoscope, 297.—Inquiries into the Quantity of Air inspired throughout the Day and Night, etc., by EDWARD SMITH, M.D., 298.—Fluorescence: A System of Instruction in the Practical Use of the Blowpipe, 300.—Lectures on Roman Husbandry: Medical Lexicon: A Dictionary of Medical Science, &c., by ROBERT DUNGLISON M.D., LL.D.: Cosmos, 302.—Graham's Chemistry: Life of Dr. E. K. Kane, by Dr. WM ELDER: Next Meeting of the American Association for the Advancement of Science, 303.—New Publications, 304.

NUMBER LXXV.

Page.

ART. XXVII. Geographical Notices. No. 1, ... 305

XXVIII. Agassiz's Contributions to the Natural History of the United States; J. D. DANA, ... 321

XXIX. Recapitulation of the "Embryology of the Turtle," as given in Professor Agassiz's "Contributions to the Natural History of the United States of North America;" by H. JAMES CLARK, ... 342

Page.

XXX. Abstract of a Meteorological Journal, kept at Marietta, Ohio; by S. P. HILDRETH, M.D., - - - - - - 357

XXXI. On the Extraction of Salts from Sea-water; by T. STERRY HUNT, of the Geol. Commission of Canada, - - - 361

XXXII. Contributions to Analytical Chemistry; by HENRY WURTZ, 371

XXXIII. The Passage to the North Pole; by Dr. I. I. HAYES, 384

XXXIV. A Chemical Examination of the Commercial Varieties of Brown Sugar; by JOHN H. ALEXANDER and CAMPBELL MORFIT, 393

XXXV. Fifth Supplement to Dana's Mineralogy; by the Author, 396

XXXVI. On the effects of Initial Gyratory Velocities, and of Retarding Forces, on the Motions of the Gyroscope; by Major J. G. BARNARD, A.M., - - - - - - - - - 417

XXXVII. Supplement to an Eumeration of North American Lichenes: Part first, containing brief diagnoses of New Species; by EDWARD TUCKERMAN, A.M, - - - - - - 422

CORRESPONDENCE.—Correspondence of J. NICKLÈS: Biographical notice of Thenard: Death of Peclet, 430.—Submarine railroad between France and England, 431.—Perforation of lead by insects, 432.—Academy of Sciences—Distribution of Prizes, 433.—Prize in Chemistry: Prize in Physics, 434 Prize in Geology, 435.—Correspondence of T. STERRY HUNT: On the origin of Feldspars and on some points of Chemical Lithology, 435.—On Euphotide and Saussurite, 437.

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the equivalents of certain Metals: On the preparation of pure compounds of Cerium, 438.

Geology.—Fossils of Nebraska, by F. B. MEEK and F. V. HAYDEN, 439; and by Dr. J. LEIDY, 441.—Permian of Kansas and New Mexico: Remains of Domestic Animals among Post-pliocene Fossils in South Carolina, by FRANCIS S. HOLMES 442.—On the slow rise of the shores of the Baltic: Mean Density of the Earth: Cretaceous Fossils from Vancouver Island: Temperature of the Earth at great depths, 443.—Geological Survey of Canada, by Sir W. E LOGAN, 444.—Iowa Geological Survey: The Chemistry and Metallurgy of Copper, including a description of the principal Copper Mines of the United States and other countries, etc., by A. SNOWDEN PIGGOT, M.D.: The Wheatley Collections: Third Report of the Geological Survey of Kentucky, made during the years 1856 and 1857, by DAVID DALE OWEN, etc., 446.—Descriptions of New Fossils from the Coal Measures of Missouri and Kansas, by B. F. SHUMARD and G. C. SWALLOW, 447.

Astronomy.—Two new Planets: First Comet of 1858, 447.—Second Comet of 1858, 448.

Miscellaneous Scientific Intelligence.—The Annual Variations of Atmospheric Pressure in the Gulf of St. Lawrence, by WILLIAM KELLY, M.D., R. N., 448.—The Hand-Book of Practical Receipts of every day use, by THOMAS F. BRANSON, 449.—Report of the Superintendent of the U. S. Coast Survey for 1856: Reports of Explorations and Surveys for a Railroad from the Mississippi River to the Pacific Ocean, 450.—*Obituary*,—S. G. Deeth: Carl Freidrich Plattner, 450.—Discovery of the Permian in Kansas: Bibliography, by J. Nicklès, 451.

Index, 452.

ERRATA.

Page 375 (note), line 19 from top, after "water," add "or metallic oxyd."
" " " " 18 from bottom, after "the" insert "gaseous."
" 422, dele last paragraph of note.
" 437, dele 5th and 6th lines from bottom.

Vol. XXIV, p. 314, 21 l. from bottom, for *propositions* read *proportions*.
